EXPERIENCE

School Project | Design an app prototype for MLGB-Esport Club   Jan - Apr. 2018
- Worked in a team of four to design a practical solution for the company.
- Designed every week slides, final App interface and prototype.
- Learned how to design a product for target clients through researching and observing the problems, propose practical solutions and finally make the final outcome.

Personal Project | Build a startup landing page   Apr - May, 2020
- Customized a business landing page using a HTML/CSS temple.
- Added an email subscribe function with Mailchimp.
- Learned how to create subscribe function with Mailchip and implement that in code.

Personal Project | Build a face detection website   May - Jun, 2020
- Built the website with a image recognition API using React.
- Built its own server and own database using node.js, express.js and SQL that users can register, sign in and sign out.
- Learned how to use API in website and how to connect the front-end website with the back-end server and database.

Part-time Experience | Fungo Holiday Ltd.   July, 2019 - Present
- Update and maintain the company website through WordPress.
- Design creative posters for every travel promotion.
- Designed a magazine advertising layout for the company.
